Packing and Shipping:

Packaging and Shipping

The mechanical wrist watch will be packaged in a cardboard box with foam inserts.

The box must be tightly secured to ensure the watch does not move around during transport.

The watch must be shipped with a tracking number to ensure it arrives safely.

FAQ:

Q: How long does the battery last on a mechanical wrist watch?

A: A mechanical wrist watch is powered by a mainspring that is wound manually. The battery is not required and the watch will run for as long as the mainspring remains wound.

Q: What materials are used for the case and band?

A: Mechanical wrist watches are typically made with a stainless steel case and leather, rubber, or metal band.

Q: What type of movement does a mechanical wrist watch have?

A: Mechanical wrist watches have a manual-wind movement which is wound by hand using a crown.

Q: How often should a mechanical wrist watch be serviced?

A: It is recommended that you have your mechanical wrist watch serviced every 3-5 years to ensure accuracy and reliability.

Q: What is the accuracy of a mechanical wrist watch?

A: The accuracy of a mechanical wrist watch can vary depending on the quality of the watch and how well it is maintained. Generally, a mechanical wrist watch will have an accuracy of +/- 15 seconds per day.
